Salt Lake City, UT 84114

Attn: Anthony A. Gallegos, Senior Reclamation Specialist

Dear Mr. Gallegos

In reference to your letter dated June 10, 1999, please be advised that we have no knowledge of any surface disturbance of the property in question. We have not disturbed or removed materials from these mining claims for several years past and would be most appreciative of information you may be able to furnish (present or future) of any parties disturbing or removing materials from these claims.

None of the principals or employees of Organa Mineral Products have visited the claims in question since prior to our letter of December 10, 1998. In answer to your question of Gary Jackson's association with Organa Mineral Products, Inc., he is one of the principals of that corporation and is currently serving as President.

Concerning your request to provide a map showing current disturbances; since that would necessitate a special trip to verify and map the disturbances mentioned by Buzz Rakow of the BLM; it would be better to have Mr. Rakow provide you with the requested information.

Concerning your request for a map showing past disturbances of the area in question by Organa Mineral Products, Inc., I believe that information is currently on file with the BLM and could easily be obtained from them. If there is any difficulties regarding the matter of site identification, please let us know and we will bring you current by resubmitting a map outlining our past disturbances, etc.

Sincerely

Kenneth D. Westwood,
